A4 label presentation, the technology and its use, has continued to expand in terms of its complexity, availability and market share. The driving force behind this technology shift is the continuing switch from dot matrix overprinting to faster, quieter, improved definition and higher versatility A4 printers such as Laser and Ink Jet.

Cost wise, in recent years, most A4 printers both Inkjet and Laser have seen dramatic improvements in price-performance ratios and this in turn has lead to significant increases in hardware sales and consumable diversity.

SOHO (Small Office Home Office) has seen the most significant levels of growth within the A4 label market, with Inkjet technology largely meeting the need. Within the high volume end of the market i.e. industrial, logistics, retail users, monochrome and colour laser is the technology of choice.

Lattice Labels has continued to grow its product range to meet the increasingly diverse needs of this growing market from home to heavy duty applications. Our innovative focus is on solutions that consistently deliver reliable performance.

Our new brochure gives an idea of the range of laminates and label sizes available from stock. It also gives you a glimpse of the availability and diversity of non-standard materials and label sizes. Our current range meets most existing requirements but if you have a unique requirement not currently catered for please try us we will be delighted to offer a solution.

Our bespoke label range, although already extensive, continues to grow to meet customer demand. Why not, add value by taking advantage of the many bespoke options available as well:

Bespoke Products:

- More materials than all our competitors put together.
- Print up to 7 colours including process and over varnish.
- Print on front and back of sheets.
- Adhesive printing for instructions.
- Adhesive kill for special effects.
- Front and back die cutting for carrier bullets and other special die cut work.
- Over-laminating film or double-sided tape addition.
- Perforation, drilled or punched holes.
- Integrated patch labels.
- And of course all this backed up with technical support.

Stock Products:

- 38 Sizes - White Perm available ex stock for next day. Stock special materials on a 5 day delivery.
- 25 Stock special materials as listed.
- Satisfy virtually any end user need within a few days.
- All popular software formats covered.
- The very best technical support.
